Simplifying TRAINING

Is training required by WCB Regulation?

Training plays an essential role in protecting workers on the job. Section 115 of the Workers Compensation Act requires employers to provide workers with “the information, instruction, training, and supervision necessary to ensure the health and safety of those workers in carrying out their work and to ensure the health and safety of other workers at the workplace.”

There are general training requirements in many sections of the WorkSafeBC OH&S Regulation.

We can help you understand the requirements but more importantly... what training you'll need to keep your workers safe.
